Excel 2019-Advanced

## **ISOGRAD (TOSA)**

Ms fst\_1644600 Ist\_1644600

Candidate ID: 1644600

Score: 65/100

Test date: November 21, 2023

## 1. Result

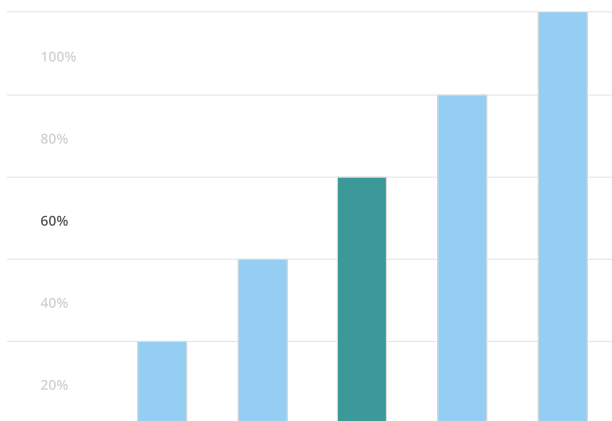

### SCORE

65/100

Based on the candidate's performance in the Excel 365 test, it is evident that they possess a strong understanding of various skills. The candidate has demonstrated proficiency in data manipulation, as evidenced by their ability to use advanced filter and slicers, and their knowledge of pivot table features. They also exhibit competence in formatting tasks such as utilizing conditional formatting and creating chart types like radar charts. Additionally, the candidate shows expertise in employing functions like COUNTIFS and time calculation functions. However, there are areas for improvement such as understanding complex conditional formatting and protecting worksheets. Overall, the candidate showcases a solid grasp of Excel 365 functionalities with room for growth in certain advanced techniques.

## 2. Domains

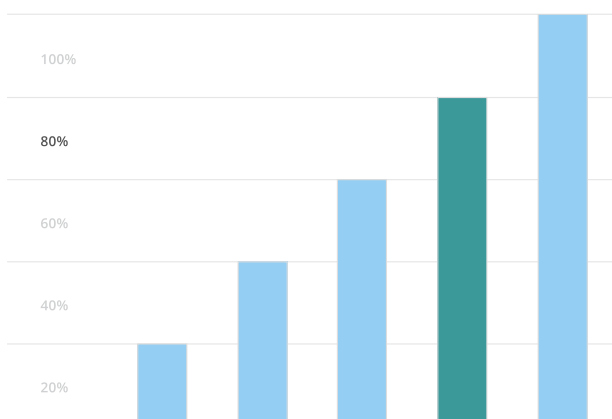

### Methods

### AI generated skills analysis Beta

This domain covers the Excel software environment, including window elements, ribbon customization, Quick Access Toolbar. It also includes questions related to saving and printing documents in Excel, workbook layout, and document protection. The candidate was not able to customize sparklines or inspect a document but demonstrated understanding of changing a range name and using the "Paste Special / Multiply" tool. The candidate is able to protect a worksheet with an overall success rate of 42.86%.

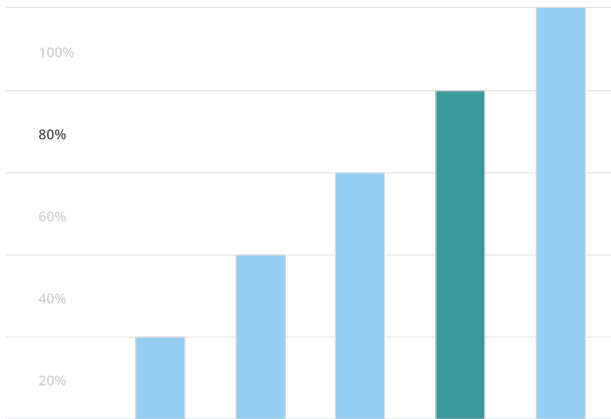

### Functions

### AI generated skills analysis Beta

Questions in this domain cover formulas and functions from simple (computing a sum) to complex (database functions like VLOOKUP). The candidate was able to use time calculation functions, make date computations and utilize COUNTIFS function effectively with an overall success rate of 66.67%. However, the candidate was not able to use the "Advanced Filter" tool effectively.

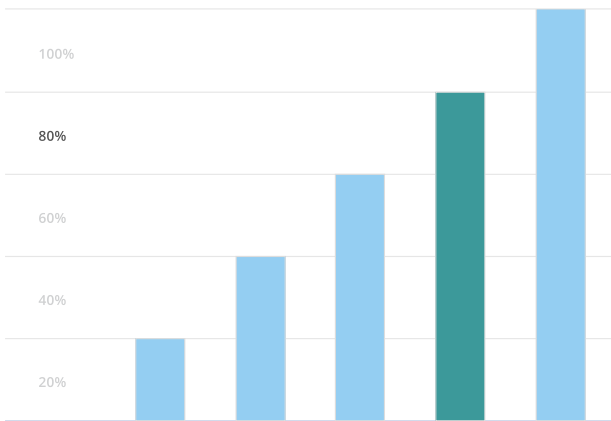

Formatting

AI generated skills analysis Beta

The candidate demonstrated a good understanding of cell formatting, advanced number formatting, and conditional formatting with a success rate of 66.67%. The candidate was able to customize sparklines and use the 'Conditional Formatting' tool. However, the candidate was not able to answer questions related to complex conditional formatting. It seems that the candidate does not seem to understand this concept well.

Data manipulation

AI generated skills analysis Beta

The candidate showed proficiency in data manipulation with a success rate of 66.67%. The candidate is able to use advanced pivot table features and understands chart/radar charts. Additionally, the knowledge on using slicers is evident from their performance on related questions.
