ALPHANUMERICAL DATA ENTRY

WHAT IS THE ALPHANUMERICAL DATA ENTRY ONLINE TEST?

The Alphanumerical data entry online recruitment test assesses the candidate's speed and accuracy in typing alphanumerical data such as addresses, telephone numbers or emails, as well as their ability to switch between alphabetical and numerical keyboards.

DIMENSIONS ASSESSED

▶ Typing speed

▶ Typing accuracy

▶ Mastery of alphabetical and numerical keyboards

▶ Symbol insertion

▶ Attention to data

ADVANTAGES

▶ Complete autonomy on Interpreto's user-friendly platform for test administration and report management.

▶ Report is generated instantly, as soon as the candidate completes the test.

▶ In addition to providing the overall result, the results report gives you the candidate's typing accuracy percentage as well as their typing speed for each question.

DEVELOPMENT OF THE TOOL

The Alphanumerical data entry test is owned and maintained by Isograd/TOSA*
